

THIS SOFTWARE IS THE PROPERTY OF SYED ZAIN MASOOD AND IS TO BE USED FOR RESEARCH, NON_COMMERCIAL PURPOSES ONLY.

Instructions for running the code:

1. To run the code, you need to specify the saturated image filename in the **driver.m** file.
2. Once you have the result, you can do a pixel-wise adjustment using the *Curve* software in **GIMP** as follows:

1. Open the image in **GIMP** and go to **Tools** → **Color Tools** → **Curves**

2. Adjust the curve for a visually pleasing image.
